Subject: Re: GSK RSV PHI ms | GraphPad Prism files for Figure 4

Hi all,

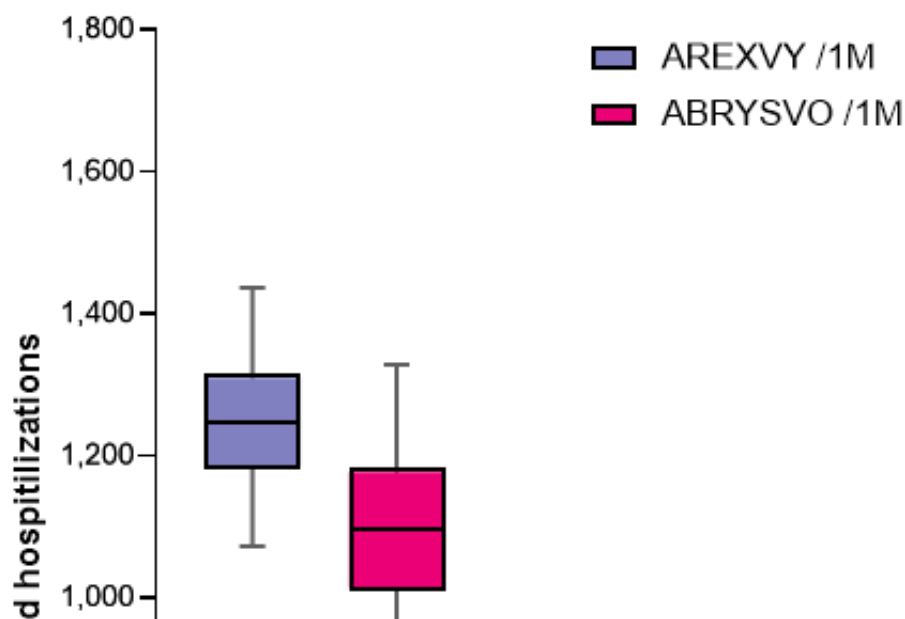

the files are in the folder (the one with the link sent yesterday).

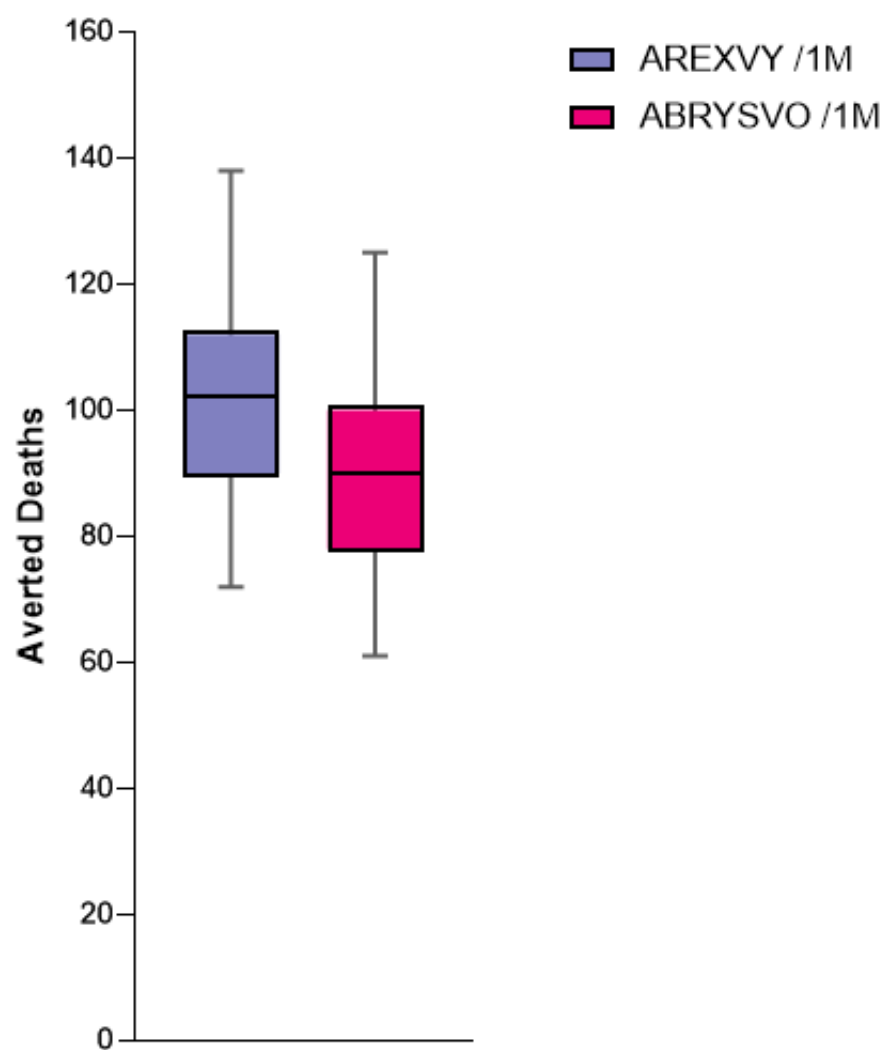

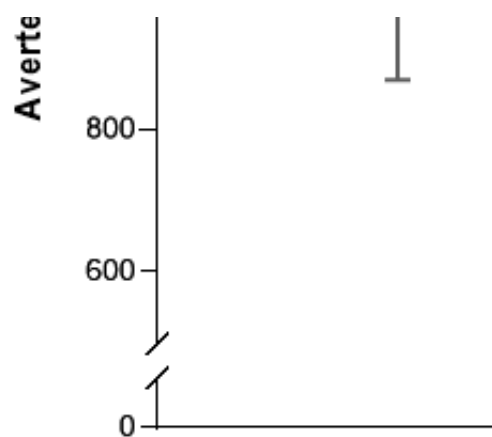

Screenshots below - let me know if you also want exported csv files (to check actual plotted numbers) or will DC by "drawing" and making sure that the lines are indeed in the right place!

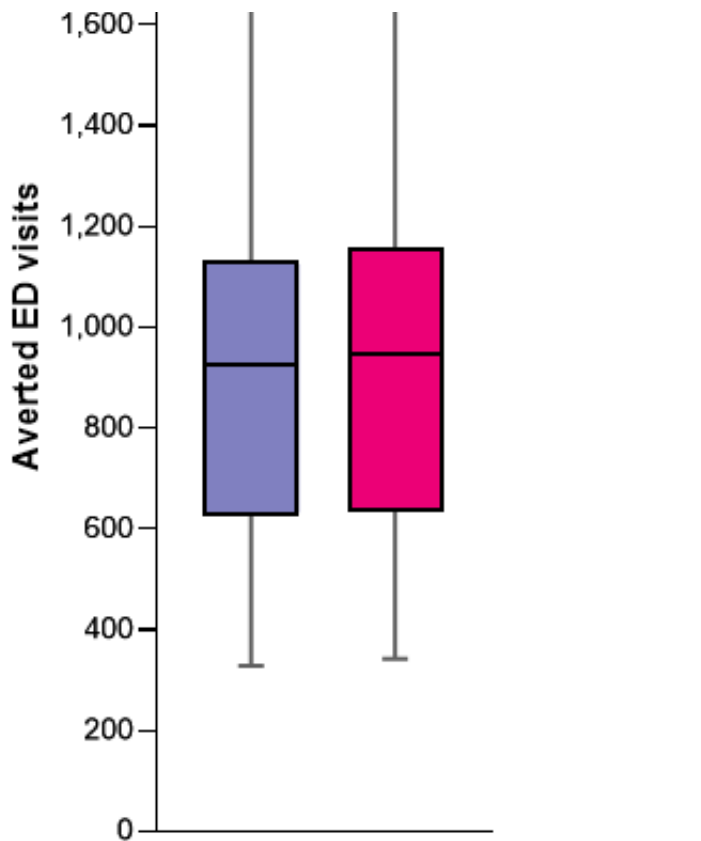

Its easy to update the file in Prism - any number updated in the data tables will auto update the individual graph, as well as the composite graph with both IQR and 95% CIs (the layouts).

Hopefully you have it all, but let me know if something looks wrong!

Rose

Subject: GSK RSV PHI ms | GraphPad Prism files for Figure 4

Hi Rose,

Thank you for the update on the redrawing of Figure 4 box plot.

It sounds like we will need to set up a briefing call with studio for this, as I do not have experience with the preferred files you describe below.

I will update the brief now as "live" but will first need to have the link for the EPS /Prism files before I do that.

Can you share this as soon as you can, so studio can work on this tomorrow?

Caroline

Subject: Re: GraphPad Prism expertise?

Hi,

its a definite to complete today (won't be a problem as not much needed now have a "template" via sorting the first graph, so minimal brain power) - just that have a few "must do"s to move this morning so back with US team mates for when they log on.

Is there a time you must have them by - having reviewed the PPT, they will need to go to Studio once plotted to compile the full figure. Prism gets the individual graphs made, but standard is to then copy them into Adobe Illustrator (which is specifically with Studio) for a final figure.

I am going to give you each one as an EPS, as well as giving you the Prism file. IMO, its better that Studio copy direct from Prism into Illustrator (cntrl c, ctrl v) vs going via an EPS - my experience is its cleaner (formatting into EPS and back to AI format can make text and lines go odd). I know some people in Studio can do this (I want to say Louise). Flagging as it sounds like you need the figure urgently, and if you need that heads up to Studio to expect it (and, in turn, tell me when Studio are ready for the file(s).

Hi Rose,

Just checking how you are getting on with the Figure creation in Prism.

I will be free after 4pm if you need to discuss.

Subject: RE: GraphPad Prism expertise?

Hi all,

Just wanted to provide an update on this since I am on AL tomorrow and Friday. Rose is kindly plotting the box plots and will complete these tomorrow. [@Caroline Ayres](#) could you kindly check/review these tomorrow when they are ready?

Rose will save down an editable EPS file that studio can use/edit if needed, in addition to prism file to this folder:  [Figure 4 DC](#)

Thank again Rose and hope you all have a lovely weekend when you get to it,
Shakirah

Subject: RE: GraphPad Prism expertise?

Hi Rose,

Thanks for offering your time to plot some box plots, it's really appreciated!

In the folder ( [Figure 4 DC](#)) you should find an excel spreadsheet titled '20241219_model_output_PSA' – if you go to the tab titled 'Ranked SCEN 2' you will see the highlighted data that will need to be plotted. If you prefer to the other files in the folder, you can see how the box plot should be appear in terms of style and labelling.

Feel free to send me a message on Teams if you need any further explanation and thank you again 😊

Shakirah

Hi Rose,

These look very similar to ours! I'll connect you with [@Caroline](#) and [@Faye](#) for next steps, as tomorrow's my last day with Prime.

In short I'm sure Caroline would very much appreciate any support in re-rendering our box plots using Prism 😊

Thanks,

James.

Subject: Re: GraphPad Prism expertise?

Hi James,

I made these ones recently (were in front me exactly when your email came in) - I don't have much capacity, but would have time to show someone already familiar with Prism how to create. They show median, IQR, and range (in fact each is 2 plots superimposed, one with range and one with IQRs).

Subject: GraphPad Prism expertise?

Hi all,

The Paragon GSK team and I are working on a manuscript with some box plots, which have been hand-drawn.

For improved data integrity we would like to re-render these using GraphPad Prism. If you're familiar with using Prism (even better if you've made box plots in it!) then please could you respond to this email with myself and Caroline (cc'd) in cc?

Thanks for your help,

James.
